

**Digital Acoustics and SureView Systems Deliver  
IP Audio and Video Monitoring Solution**  
*Remote Monitoring Enhanced with IP Audio Solution*

**Lake Forest, IL** (July 30, 2008) – [Digital Acoustics](#) today announced that [SureView Systems](#) has integrated the Digital Acoustics' IP intercom and paging solutions with its [Immix®](#) video-based alarm automation software. The integration allows 'remote guards' to talk, listen and view intruders or visitors over IP, regardless of location.

"For two years we looked for a robust, reliable, two-way IP audio solution, and found exactly that with Digital Acoustics", said Graham Johnson, CEO of SureView Systems. "The inclusion of this feature enables our customers to implement remote access management and interactive security services with industry standard technologies and confidence."

Combining Digital Acoustics and Sureview technologies enhances critical human interaction during alarm events. The integration also offers a solution for "Verified Response" laws currently on the rise. Command center personnel will have both audio and video input to verify an emergency is taking place before dispatch.

Earlier this year, Digital Acoustics announced the availability of the [IP7 Series](#), the company's next generation IP/Ethernet audio solution. The five new products offer basic intercom functionality to high-power IP audio amplifiers, and are designed to convert analog call stations and speakers into IP-based two-way communicating devices.

"Responders now have the audio and video solution they need for immediate action," said Chris Coffin, CEO of Digital Acoustics. "This integration provides a scalable, cost-effective solution for central stations, enterprise and campus security centers alike."

**About Digital Acoustics**

Digital Acoustics develops innovative intercom and paging products to improve the capabilities of informational, event-based or access control networks. Because they are 100% IP-based, Digital Acoustics systems provide interactivity, precision, and flexibility in use and design, resulting in simplified, cost-effective solutions that enhance safety and support without limiting future options. For more information call (877) 724-3387 or visit [www.digitalacoustics.com](http://www.digitalacoustics.com).

**About SureView Systems**

SureView Systems develops security software for central stations and other command centers. SureView's UL classified Immix® product provides users with a single platform to receive alarm events from industry standard receivers, video cameras or DVR's; video analytics; and access control systems. For more information please visit [www.SureViewSystems.com](http://www.SureViewSystems.com) or call (800) 495-5939.
